

Abstract submission system is now closed we will be happy to have your submission next year.

You are welcome to register for the conference here <http://bioforumconf.com/registration>

Building on previous successful ISRANALYTICA events, this conference has now become a major venue for industry and research institutions to get the latest updates and exchange information about recent advances and emerging technologies.

It is our goal to present all aspects of analytical chemistry, including presentations from academia, industry and analytical services.

Topics to be covered by Isranalytica 2013 are:

- Separation Sciences (LC, CE, GC etc.)
- Mass Spectrometry
- Analytical Spectroscopy and Electrochemistry
- Pharmaceutical Analysis and Process Analytical Technologies (PAT)
- Chemical Analysis
- Forensic and Homeland Security Analysis
- Food Analysis, Agriculture Analysis and Environmental Analysis
- Bio-analytical and Biopharmaceutical Analysis
- Petrochemical Analysis
- Analytical Chemistry in Proteomics, Genomics, Lipidomics & Metabolomics
- Sensors and Nanoparticles for Analysis
- Metrology, Quality and Chemometrics
- Advancements in Instrumentation
- Computerized Analytical Chemistry
- Analytical Chemistry Education
- Analytical Applications in Archaeological Sciences
- Regulatory Issues in Analytical Chemistry

And any other topic with relevance to analytical chemistry.
