

The Firm

Reinhold Cohn Group (RCG) is the earliest and leading Intellectual Property consulting firm in Israel. RCG offers a full breadth of Intellectual Property related services and expertise including – Protection, Asset Management, Due Diligence, Litigation & Legal services. The firm operates in all areas of IP such as patents, trademarks, designs, copyrights, open source, plant breeders' rights, etc.

The group includes the patent attorneys firm **Reinhold Cohn & Partners** and the law firm **Gilat, Bareket & Co.**

The synergy of patent attorneys experienced in a diverse spectrum of technological and scientific disciplines working alongside legal professionals, creates a unique and effective platform for maximizing the value of a client's Intellectual Property assets by securing optimal protection.

The Group employs over 230 professionals, out of which over 65 are patent attorneys and attorneys at law.

RCG and its team are internationally renowned for excellence and are continually ranked in the top tiers in leading international and local guides such as: **Managing Intellectual Property, Chambers & Partners, Legal 500, WTR1000, IAM 300, IAM 1000, Who's Who Legal, Expert Guides, D&B Israel & BDI.**

Professional Departments

Life Sciences & Chemistry handles inventions in a wide spectrum of fields: biotechnology, pharmaceuticals, medical compositions and equipment, molecular biology, organic and inorganic chemistry, agriculture, nanotechnology, biochemistry, pharmacology, food technology, diagnostics and greentech and related fields.

Hi-Tech operates in a wide range of technologies including computers (hardware and software) and computer-based inventions, electrical engineering and electronics, electro-optics, cellular technology, databases, multi- and digital-media, integrated systems and processes, semiconductor devices and related processes, communications and telecommunications, Internet, computer based business methods, storage, etc.

Mechanics & Technology handles inventions in the fields of mechanics and engineering. The departments specializes in various engineering domains such as mechanical engineering, automotive, aerospace, maritime, materials and agriculture. Other expertise are optics, medical devices and equipment, agricultural and water technologies, consumer products, packaging and handling of merchandise and materials, military technologies, dentistry, etc.

Physics handles inventions in the fields of optics, electro-optics, acoustics, electrical engineering, optical communication, optical and electronic information storage, semiconductor-based technologies, medical devices, nanotechnology, etc.

Medical Devices is an interdisciplinary field combining various areas of expertise, including engineering, life science, physics, electronics, material science, software, pharmaceuticals and others. This field demands an innovative multidisciplinary approach and therefore ad hoc teams of professionals are formed to handle specific projects, each one handling the aspects within their technological area of expertise.

Trademarks provides strategic and legal counselling relating to selection of trademarks and their proper use, planning, implementation and management of international trademark portfolios for local and international clients. The department conducts searches to ascertain the degree of freedom to operate, provides opinions regarding availability for use and inherent registrability. It handles trademark filing, prosecution and registration as well as domain name registration, drafts trademark-related agreements, and maintains worldwide trademark watches.

Gilat, Bareket & Co., Attorneys at Law

The law firm of **Gilat, Bareket & Co.** is a leading intellectual property firm in Israel, specializing in litigation and legal protection of intellectual property rights in patents, technology, brands, designs, creative works and inventions.

With years of professional experience, **Gilat, Bareket & Co.** garners recognition for successfully litigating landmark cases and representing domestic and international clients. The firm's areas of expertise, include patent and trademark litigation, protection of designs and copyright, structuring and negotiating IP-related contracts and transactions. The firm helps its customers with R&D and license agreements, knowledge acquisition and technology transfer agreements and agreements vis-à-vis collective rights management societies. The firm also provides a service of enforcement of brand owners' rights to prevent import and distribution of counterfeits and imitations. Other areas of expertise include investment agreements, obtaining financing from the governmental Office of the Chief Scientist and other institutional investors, non-disclosure agreements, distribution agreements, Internet law and strategic cooperation with foreign companies.

In addition, the firm provides general legal assistance in other fields, e.g., company law, competition law, antitrust and property law, and successfully represents its clients before the courts in Israel and before the Patents, Designs and Trademarks Registrar.

Gilat, Bareket & Co. employs 13 attorneys at law, several of whom also hold academic degrees in sciences. Extensive legal knowledge and experience, as well as the technological and scientific insight enable Gilat, Bareket & Co. to offer an effective and optimal legal protection strategy which considers each client's intellectual property assets in light of its business strategy in general.
